Made in France

Dr. Alfred Marchal, Head of Alphascience Research

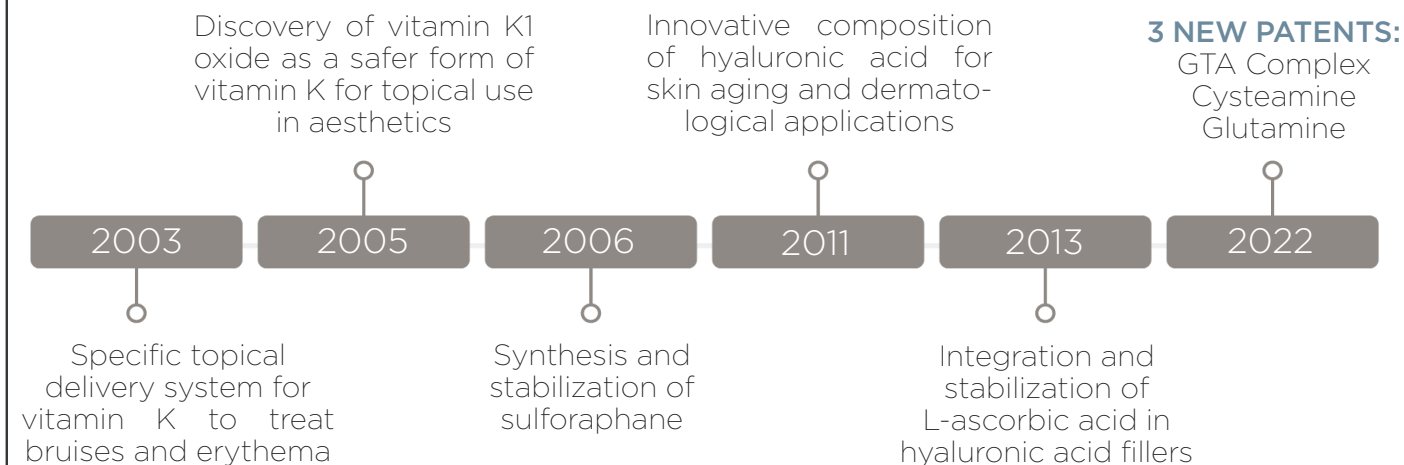

With a PhD in Organic Chemistry, Alfred Marchal is a French pioneer in the search for cutting-edge antioxidant complexes and aesthetic medicine innovations.

In 2016, he co-founded ALPHASCIENCE. He started working as Head of Research, in fundamental research, imagining the anti-aging treatments of the future and creating innovative exclusive solutions to fight skin aging.

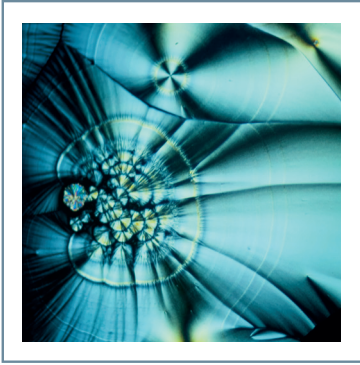

He has an academic experience of 35 years in R&D with numerous scientific papers and patents on Vitamin C, Tannic Acid and Cysteamine stabilization.

He also created the unique NextGen® complex able to stabilize the most fragile molecules.

Dr. MARCHAL'S PATENTS:

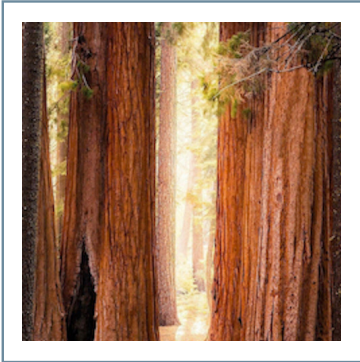

WORLDWIDE EXCLUSIVE INNOVATIONS

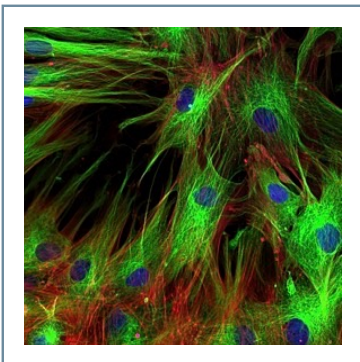

STABLE L-ASCORBIC ACID

L-ascorbic acid is widely known for its broad antioxidant and anti-aging properties. It has been shown to limit melanin transfer, stimulate collagen synthesis, prevent spots formation and enhance skin radiance.

TANNIC ACID

Tannic acid showed unique properties for the skin. It has a protection capacity superior to the best antioxidants. It regulates pigmentation, stimulates collagen synthesis, and strengthens the vessel walls to reduce vascular fragility.

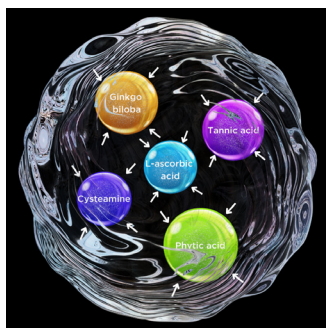

STABLE CYSTEAMINE

Cysteamine is a powerful antioxidant with high depigmenting activity, and is safe for all skin phototypes including V and VI. Cysteamine has a characteristic scent. Thanks to our Nextgen® stabilization technology, its scent does not change over time. It is therefore not necessary to rinse.

NEXTGEN® TECHNOLOGY

Thanks to the modulation of antioxidants' ionization, our technology allows the stabilization of the most powerful and fragile molecules such as pure Vitamin C, Tannic Acid and Cysteamine.

BEFORE
INSTABLE WATER BASED SYSTEM
Antioxidants degradation by ionization and electron exchanges.

AFTER
STABLE WATER BASED SYSTEM
A shield is created by a ionization modulation system.

THE HIGH-PERFORMANCE ANTIOXIDANT SERUMS

For daily use and as a complement for aesthetic procedures - Perfume free, preservative free

ANTI-AGING

TANNIC [CF] SERUM

Normal to dry and sensitive skin
pH 3.9

- 10% Stabilized L-Ascorbic Acid
- 2% Tannic Acid
- 0.5% Ferulic Acid
- Ginkgo Biloba concentrate

SKIN REVITALIZATION

PHYTIC [TC] SERUM

Normal to combination skin
pH 3.3

- 8% Stabilized L-Ascorbic Acid
- 2% Phytic Acid
- 0,2% Tannic Acid
- Ginkgo Biloba concentrate

HYPERPIGMENTATION

NEW

MELA BRIGHT [C+]

All skin types
pH 3.85

- 3% Patented Stable Cysteamine
- 8% Stabilized L-ascorbic acid
- 1% Phytic Acid
- Acetyl Glycyl β -Alanine
- Ginkgo Biloba concentrate

ALPHA BRIGHT SERUM

All skin types
pH 3.7

- 8% Stabilized L-Ascorbic Acid
- 2% Phytic Acid
- Acetyl Glycyl β -Alanine
- Ginkgo Biloba concentrate

ALPHA BRIGHT STERILE AMPOULES

For superficial microneedling
pH 3.7

- 8% Stabilized L-Ascorbic Acid
- 2% Phytic Acid
- Acetyl Glycyl β -Alanine

Deeply hydrate the skin and enhance the aesthetic results

HA BOOSTER SERUM

All skin types
pH 5.5

- 5% Complex of Organic Silicon + Hyaluronic Acid
- 1.5% Vegetal taurine
- Biomimetic moisturizing polymer

THE HIGHLY-ACTIVE MOISTURIZERS

Tolerance tested after blepharoplasty

EYE MATRIX

Global lifting eye contour concentrate
All skin types

- 5% L-Glutamine + Genistein
- 2% Botox-like patented tripeptide
- 3% Niosome Troxerutin
- 2% Hyaluronic Acids

SURFACE [CR]

Multi active lifting solution
All skin types

- 2% L-glutamine
- 2% Patented tripeptide
- Pure Genistein
- Hyaluronic Acid

ULTRA FIRM

Neck and face sculpting concentrate
Normal to combination skin

- 2% Shiitake complex
- 2% L-Glutamine
- 2% Genistein

ULTRA DEEP

Fundamental firming cream
Dry to normal skin

- Saponaria stem cells
- Lupine protein
- Encapsulated genistein
- Aescin

Reinforce and sublimate the effects of a cosmetic procedure

REGEN [Hx]

Post procedure perfecting soothing treatment
Sensitive skin

- 5% Helicine complex
- 3% Natural defense system
- 3% Hyaluronic acid
