STAR-INGREDIENT POWER

Star ingredients are selected to deliver rapid visible results. Their efficacy has been scientifically proven, and optimal concentrations & associations are integrated into these Swiss-developed formulations.

RETINOL

Improves skin texture by prompting surface skin cells to turn over, making way for new cell growth underneath. Retinol also neutralizes free radicals and boosts the production of collagen and elastin, reducing the appearance of fine lines, wrinkles, and pores.

VITAMIN C

A powerful antioxidant that improves skin tone & texture, reduces signs of skin ageing, and favors skin hydration. Complexion is brightened and signs of photoaging are reduced.

PEPTIDES

Act as messengers and trigger the skin cells to build collagen and elastin, resulting in firmer and plumper skin. Peptides also help reduce the appearance of fine lines and wrinkles. They soothe and reduce skin inflammation, and lock in hydration.

GIGA-WHITE

A skin lightener derived from plant extracts. It targets multiple steps in the skin pigmentation process: the production of melanin and the interception of its migration to the upper skin layer. Your skin looks more luminous, and pigmentation is less visible.
